

VISTA

The advanced solution for site technology assessment.

Improves clinical study start-up for pharmaceutical companies, CROs, and EDC providers.

Before a clinical study begins, an assessment must be performed to ensure that the investigative sites' technology meets the study requirements. But some of the most advanced studies rely on antiquated site assessment methods, resulting in time-consuming, costly, frustrating study delays. VISTA helps eliminate this disconnect by making the process of site technology assessment automated, easy, and faster than ever before.

Sophisticated technology

- > Web-based service instantly evaluates technology of PCs
- > Accurately assesses, captures, and reports on technology infrastructure
- > Provides information on remote investigative sites anywhere in the world
- > Compatible with any EDC software
- > Transmits information via secure link

User-friendly design

- > Specifically created for non-technical users in clinical research
- > Provides critical information with just a few clicks
- > Automated process eliminates user error and increases efficiency

Greater accuracy in less time

- > Captures comprehensive, reliable data that quickly validates sites and facilitates upgrades
- > Runs in seconds
- > Shortens study timeline by up to 2 weeks as compared with manual methods

Site Assessment Starts Here

VISTA

Get a better view on site assessment.

Provides complete computer infrastructure profiles with just a few clicks.

- > CPU
- > Browser version
- > Operating system
- > Memory
- > Display
- > Storage
- > Bandwidth (page turns)
- > Plug-ins
- > Hardware
- > Software
- > Network
- > Connectivity
- > Security

Streamlines the site assessment process.

Move away from outdated methodology... towards

VISTA

Manual

Slow, unwieldy

Requires knowledge of computers

Potential for error in user-recorded data

Resource-intensive

Costly

Automated

Fast, efficient

Easy to use by anyone

100% accuracy

Click of a few buttons

Cost-effective
